Deadline for manuscript
submissions:

closed (31 January 2021)

Message from the Guest Editor

Brain metastases (secondary brain tumor), which are associated with extremely poor outcomes and seriously diminish patient quality of life, are the most common intracranial neoplasms in adults. The incidence of brain metastasis is increasing, likely due to improved detection of small metastases by MRI and improved management of extracerebral disease by progress of systemic therapy.

As our fundamental understanding of the biology of this disease increases, so does our ability to treat it effectively. This Special Issue will highlight the current management and future prospects for brain metastases and will include the characteristics of brain metastases from the various types of cancer—lung cancer, melanoma, renal cell cancer, breast cancer, colorectal cancer, and so on.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
