Deadline for manuscript submissions:

closed (30 June 2021)

Message from the Guest Editor

Cervical carcinoma is a common gynecological malignancy with a relatively high mortality in underdeveloped countries. Both primary prevention (HPV vaccine) and screening programs (PAP smear or HPV testing) have resulted in a significant mortality reduction. Treatment of preinvasive disease is associated with excellent results in terms of fertility preservation and quality of life. Advancement in staging procedures (diffusion MRI, PET scan), surgical management (tailoring of radicality and nerve sparing procedures) and medical treatment (novel biological compounds or immunotherapy) have been obtained in the last decades. The aim of this special issue is to focus on emerging molecular, diagnostic and therapeutic modalities for cervical carcinoma.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
