Message from the Guest Editors

Breast cancer is a major health problem in women worldwide, being one of the most diagnosed cancers and one of the leading causes of cancer death. Chemotherapy represents one of the main treatment options, especially in advanced stages of the disease or in certain breast cancer subtypes, such as triple negative breast cancer. However, the high toxicity, low aqueous solubility and rapid in vivo clearance of most antineoplastics limit their clinical use. To resolve these challenges, new innovative formulations, most of them based on micro and nanomedicine, are being investigated.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
