Deadline for manuscript
submissions:

closed (15 November 2022)

Message from the Guest Editor

Dear colleague,

This Special Issue will encompass recent research into the form and function of long non-coding RNAs (lncRNAs) that play a causal role in the etiology of lung cancer. Lung cancer will be defined broadly to include small cell and non-small cell, as well as all histological subtypes. LncRNAs will be the main subject of this Special Issue, including but not limited to their transcriptional regulation, targeting and being targeted by miRNAs, partnering interactions in protein complexes, mechanisms in the initiation, promotion, and progression of lung cancer. This Special Issue will also encompass the utility of lncRNAs as biomarkers of lung cancer and the effect that specific lncRNAs play on patient outcomes and response to current therapies.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
