Deadline for manuscript
submissions:

closed (5 August 2024)

Message from the Guest Editors

Melatonin has increasingly emerged in oncology as a naturally occurring bioactive molecule with anticancer properties and a pharmacological safety profile optimal for joining the currently available pharmacopeia. The anti-angiogenic and anti-metastatic effects of melatonin suggest that it may have potential therapeutic applications in the treatment of cancer. In addition, melatonin has been shown to inhibit the migration and invasion of cancer cells, which are important steps in the process of tumor metastasis. This effect is believed to be mediated by the downregulation of matrix metalloproteinases (MMPs). We focused our attention on the molecular mechanisms underlying the multiple oncostatic actions displayed by melatonin and its potential as an adjuvant in preclinical models, in the treatment of cancer patients, and in novel-combination chemotherapeutic cocktails. This Special Issue aims to serve as a forum to bring together researchers of different fields to advance the knowledge on the therapeutic use of melatonin against cancer.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
