Deadline for manuscript
submissions:

closed (31 May 2023)

Message from the Guest Editor

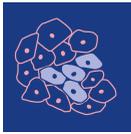

Dear Colleagues,

Extracellular vesicles (EVs) deliver biomolecules from cells throughout the body, to individual cells, tissues, and whole organs. This Special Issue is aimed at summarizing both analytical developments and clinical evidence exploring the role of EVs in cancer development, diagnostic applications, and novel therapeutic approaches, to facilitate translational research and accelerate medical impacts in oncology.

Special Issue Highlights:

- EV isolation, characterization, and normalization
- Tools for analysis of RNAseq and DNAseq data in EVs
- EVs and cancer detection
- EVs and cancer therapy
- EVs and viruses
- Novel technological developments

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
