Deadline for manuscript
submissions:

31 July 2024

Message from the Guest Editor

With increasing life expectancy and aging, cancer control becomes urgent for equitable and optimal health outcomes. To allow all populations to benefit from cancer research, we need to expand cancer surveillance and timely reporting. Thus, artificial intelligence and machine learning can help advance the identification of avoidable and modifiable risk factors and improve tailored cancer therapy. In this Special Issue, we bring bright minds from across various disciplines together to overcome the barriers of cancer. We include health equity, minorities, community partners, and daily practitioners to engage with the integral cancer-health equity in an aging population.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
