Message from the Guest Editor

Dear Colleagues,

The therapeutic landscape in follicular lymphoma (FL) has seen many changes over the last decade, and many improvements have been reached in the understanding of the complex FL biology. Nonetheless, this indolent lymphoma is still considered incurable. It seems that histology, diagnosis and prognostic factors are insufficient support for clinical practice. Research and review papers on transformed FL are welcome.

This Special Issue aims to capture new insights and relevant features of both FL biology and clinics (original research articles and reviews with original discussions) to help hematologists in patient risk stratification and in tailoring their treatment approach.

We look forward to receiving your contributions.

Dr. Lisa Argnani

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
