Deadline for manuscript submissions:

closed (15 October 2022)

Message from the Guest Editors

This Special Issue on “Gynecologic Cancers: Imaging Updates and Advances” aims to review and illustrate the imaging updates of various gynecologic malignancies, including ovarian, cervical, vaginal, vulvar, and gestation cancers. Major important areas in the field, including new knowledge on the role of advanced imaging techniques such as diffusion weighted imaging (DWI) and positron emission tomography–magnetic resonance imaging (PET-MRI) in gynecologic malignancies, will be covered. The role of radiomics and radio genomics for these malignancies will also be examined. In addition, postsurgical and post-therapeutic complications in these cases will be studied, with an emphasis on the role of imaging in the diagnosis and management of these cases.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
