Deadline for manuscript submissions:

15 March 2025

Message from the Guest Editors

Ovarian cancer is the most lethal gynecological malignancy in relation to cervical and endometrial cancers. It is associated with the worst prognosis and a high mortality rate. In most cases (75%), ovarian cancer is diagnosed at an advanced stage due to its asymptomatic and silent growth of the tumor, delayed onset of symptoms and lack of proper screening.

However, important steps have been made in the treatment of advanced ovarian cancer concerning surgery, adjuvant or neoadjuvant chemotherapy drug regimens and maintenance targeted therapy. These resulted in an improved progression-free and overall survival, and a better quality of life of these patients. Nevertheless, even with the new treatment improvements, 80% of the patients will experience recurrence.

This Special Issue aims to highlight the current practice and advances in ovarian cancer treatment, including cytoreductive surgery, HIPEC, new chemotherapeutic agents and maintenance targeted therapy.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
