Deadline for manuscript
submissions:

29 November 2024

Message from the Guest Editor

Dear Colleagues,

The dynamic interaction of neoplastic cells with the surrounding microenvironment, comprised of stromal cells and an extracellular matrix, is essential. This process promises to support the heterogeneity of the tumour compartment, and to assist in overcoming inadequate responses to therapy and increased multidrug resistance.

In this context, Hodgkin's lymphoma (HL), one of the most enigmatic cancers in which few neoplastic cells are within an abundant but ineffective immune ecosystem, represents a paradigmatic tumour for study.

For this Special Issue, we welcome articles or reviews on discoveries or new concepts to clarify the interaction between cancer, non-neoplastic cells and stroma, emphasise how this could be targeted to reduce tumour progression and loss of response to therapy, and highlight the prospects for improvement in patient management.

I look forward to receiving your contributions.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
