Dr. Yasuhiro Miki

Department of Anatomic Pathology, Tohoku University Graduate School of Medicine 2-1 Seiryo-cho, Aoba-ku, Sendai 981-8575, Miyagi, Japan

Deadline for manuscript submissions:

closed (30 April 2023)

Message from the Guest Editors

The tumor microenvironment is composed not only of tumor cells but also contains various stromal cells including leukocytes, macrophages, fibroblasts, endothelium, which, together with cross-talks between tumor cells and other cellular components, is strongly associated with tumor progression. Endocrine-related cancers (i.e., breast, endometrial, prostate cancers, etc.) are a common malignant neoplasm worldwide. Recent emerging evidence suggests that the tumor microenvironment is greatly affected by hormonal actions, which sheds new light on the pathogenesis and therapeutic strategy in endocrine-related cancers. This Special Issue will therefore be reviewed by experts in this field and encompass new research articles and timely reviews regarding the tumor microenvironment in endocrine-related cancers

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
