### Message from the Guest Editors

Gliomas are primary intra-axial brain tumors that are commonly managed in neurosurgical clinical practice. In recent years, neuro-oncological care has improved, leading to an increased number of patients being diagnosed and treated for gliomas.

We are pleased to invite you to contribute to this Special Issue that aims to collect articles dedicated to advances in neurosurgical treatment of brain tumors, especially looking at advances in neurosurgery and neuro-oncology, neuroanatomy applied to neurosurgery, neuroradiology applied to neurosurgery, new molecular targets, or new tailored therapeutic approaches. This Special Issue is dedicated mainly to primary brain tumors like gliomas, but it may consider any other paper dedicated to other intra-axial brain tumors.

## Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
