Deadline for manuscript
submissions:

29 November 2024

Message from the Guest Editor

Dear Colleagues,

Currently, radiology imaging plays a pivotal role in diagnosis and patient follow-up in the oncology field. Imaging of hepatocellular carcinomas (HCC) encompasses all types of imaging modalities, including ultrasonography (US), computed tomography (CT), magnetic resonance imaging (MRI), and positron emission tomography (PET). An important part of HCC imaging concerns providing anatomical information for preoperative planning. Innovations such as radiomics, artificial intelligence, and quantitative imaging are perfectly integrated with radiology imaging, and scientific research in the oncology field is necessary to explore all the possibilities we need to improve our diagnostic accuracy in tumor diagnosis and characterization.

The aim of this Special Issue is to provide an overview of current imaging of HCC. In particular, it will be focused on state-of-the-art and future developments in imaging of hepatic tumors, techniques for the depiction of early involvement, follow-up, risk stratification, and therapeutic response. We are inviting original research articles, reviews, and perspectives to address some of these challenges for the imaging of HCC.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
