Message from the Guest Editor

Dear Colleagues,

The liver is an organ especially sensitive to lifestyles. The way people live affects their risk to develop a liver disease and particularly a liver cancer. In the last years a large amount of evidence has been supported this regarding diet, physical activity, coffee, smoking. Some drugs may mimicks these benefits and they are of particular interest in patients with NASH since they are metabolic drugs or used to prevent cardiovascular events. This special issue will review in depth the current literature and identify areas where more data are urgently needed.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
