Dermatology Service, Hospital Universitario Ramón y Cajal, Instituto Ramón y Cajal de Investigación Sanitaria, Carretera de Colmenar Km 9, 28034 Madrid, Spain

**Dr. Stefano Bacci**

Research Unit of Histology and Embryology, Department of Biology, University of Florence, Florence, Italy

Deadline for manuscript submissions:

**closed (31 October 2023)**

### Message from the Guest Editors

Dear Colleagues,

Non-melanoma skin cancer (NMSC) is the most frequent tumor in humans. NMSC exhibits a special behavior, not only emerging through the classical route of accumulated mutation, but also via alternative pathways. We are pleased to invite you to participate in this Special Issue focused on NMSC prevention and treatment based on translational strategies with real-practice clinical application. This Special Issue is open and practical, with the purpose of linking clinical practice with basic science. Clinicians and researchers are encouraged to share their detailed experience, including negative or null results.

This Special Issue aims to:

- Expand the knowledge of novel clinical strategies for NMSC treatment and prevention.
- Share new targeted therapies in NMSC with the scientific community.
- Be a connector between dermatologists and basic research.

In this Special Issue, original research articles and reviews are welcome.

We look forward to receiving your contributions.

Dr. Montserrat Fernández-Guarino

Dr. Stefano Bacci

## Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
