Message from the Guest Editor

Dear Colleagues,

Although low-dose CT has proven beneficial for lung cancer screening, there is a substantial benefit in incorporating biomarkers into lung cancer screening. This Special Issue is intended to provide an update regarding the potential contribution of a wide variety of blood-based biomarkers to lung cancer screening, from risk assessment to early detection to interpretation of imaging findings.

This is an invitation to submit original work or timely reviews related to the topic of this Special Issue.

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.
