Message from the Guest Editors

Overall, in the last decades, innovations in multidisciplinary management have been consistent, and have been directed towards a more personalized approach. Accordingly, aim of this Special Issue is to provide evidenced-based data focused of new modern treatment approaches encompassing the tumor biology, prognostic and predictive factors, and diagnostic settings, as well as therapeutic strategies. The submission of works encompassing the integration of clinical metadata with computational approaches and artificial intelligence is also encouraged.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits
