Message from the Guest Editor

Dear Colleagues,

The treatment of metastatic prostate cancer has evolved enormously within the last decade. The outcome data of recent clinical trials are encouraging in that prognosis of metastatic prostate cancer can be shifted from a life-threatening to chronic disease. However, novel resistance mechanisms complicate tumor control in advanced stages. In particular, treatment-related anaplastic tumors with neuroendocrine features pose a challenge for urooncologists.

Therefore, it is of major importance to explore the genetic alterations leading to treatment resistance and to seek out potential targets for specific treatment to regain tumor control.

In this Special Issue, experts in this field will review the current approaches to the management of patients with metastatic prostate cancer.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
