Message from the Guest Editors

Dear Colleagues,

Significant progress has been made in the understanding of the biological underpinnings of pancreatic cancer in recent years. Coupled with this progress, multiple groups have identified biomarkers that may aid in our early detection of the disease, personalization of therapy for patients, measurement of treatment response, and imaging of the cancer. Such biomarkers have been identified in a wide array of information sources, including but not limited to tissue, blood, urine, imaging, electronic health records, and internet search data. We invite you to share your work related to biomarkers of pancreatic cancer in this special issue of *Cancers*.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
