Message from the Guest Editor

Dear Colleagues,

Head and neck cancer (HNC) comprises a group of malignancies, with variation in incidence, risk factors, and prognosis. Late diagnosis and the inability to predict disease progression remain major factors in the grim outcome of certain HNCs and emphasise the need for identifying markers capable of early detection of malignant transformation.

Understanding the complexity of the tumour microenvironment is also essential for identifying novel therapeutic targets and markers for patient stratification for therapy.

This Special Issue focuses on advances in basic, translational, and clinical research, aimed at improving detection, diagnosis, treatment, and prognosis of this devastating disease.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
