Message from the Guest Editors

Dear Colleagues,

Oral and oropharyngeal cancers still represent a challenge because of different etiologies (smoke, alcohol, and human papillomavirus) and carcinogenesis. Flap reconstruction and transoral robotic surgery facilitate better functional results, while de-escalation trails have been performed for HPV-related oropharyngeal tumors. However, the recurrence rate and mortality did not decrease in recent years. Furthermore, despite the emerging role of immunotherapy for recurrent/metastatic cancer, the treatment of advanced tumors remains challenging.

This Special Issue aims to highlight the current state of the art and describe future perspectives for the management of oral and oropharyngeal cancer. In particular, original articles and reviews from translational research to clinical practice are welcome.

We look forward to receiving your contributions.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
