Deadline for manuscript submissions:

**closed (30 June 2023)**

### Message from the Guest Editors

Dear Colleagues,

The intricate ecosystem of the tumor immune microenvironment (TIME) is critical to tumor progression and anti-tumor therapy responses. In the last decade, cancer immunotherapies have caused a paradigm shift in cancer treatment and have greatly improved patient clinical outcomes for multiple cancer types. The advancements in our understanding of the TIME have led to the identification of multiple critical components that are essential for eliciting a successful anti-tumor immune response. Notably, the immunosuppressive microenvironment impairs the anti-tumor immune response and needs to be investigated extensively and targeted therapeutically.

In this Special Issue, original research articles and reviews are welcome. We look forward to receiving your contributions.

## Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
