### Message from the Guest Editors

Melanoma is an aggressive cutaneous cancer that causes the greatest number of skin-cancer-related deaths worldwide. While early-stage melanoma can be cured successfully by surgical resection, stage IV melanoma has a dismal prognosis and is almost completely resistant to conventional chemotherapy and radiotherapy.

The aim of the present Special Issue is to create a collection of studies focused on the identification of new molecular mechanisms and biomarkers of drug resistance to molecularly targeted drugs used or under investigation to underline the current state of the art in these new promising weapons against cutaneous melanoma.

Deadline for manuscript  
submissions:

**closed (30 June 2023)**

an Open Access Journal by MDPI

## Editor-in-Chief

Houston, TX 77030, USA

## Message from the Editor-in-Chief

*Cancers* (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
