Deadline for manuscript  
submissions:

**closed (31 December 2021)**

### Message from the Guest Editors

Dear Colleagues,

Our understanding of the biology of cancer has grown rapidly over the last decade, leading to advances in new types of targeted therapies and novel therapeutic approaches.

This Special Issue will discuss recent advances in minimally invasive treatment for GI oncology; endoscopic therapy for early GI cancers; surgical management (including techniques and considerations for minimally invasive approaches); and innovations in neoadjuvant and adjuvant chemotherapy, immunotherapy, and radiation treatment for GI cancers. This Special Issue will also discuss the roles of the novel therapies, including rational and structure-based drug design, that are currently being pursued in the clinical setting and hold the promise of improving the clinical outcome of these conditions.

Dr. Saowanee Ngamruengphong

Assoc. Prof. Fabian M. Johnston

Assoc. Prof. Lei Zheng

## Message from the Editor-in-Chief

*Cancers* (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
