submissions:

closed (31 January 2024)

Message from the Guest Editors

In the present Special Issue, we would like to focus on the (anti-)metabolic activities of dietary polyphenols, which merit more attention. Metabolic derangement is a hallmark of cancer, and aerobic glycolysis provides pyruvate, the basic building block for the production of nucleic acids and proteins that is required by fast-dividing cells. Interference with the neoplastic metabolic program can contribute to cancer prevention and therapy, but the true potential of such approaches has not yet been completely revealed.

We are pleased to invite you to contribute original articles, reviews, and commentaries on the above with the aim of reflecting the state of the art in research on polyphenols and cancer metabolism. Dietary compounds and control of metabolism are much debated beyond the scientific community, and incorrect information and myths pervade public discussion. For this reason, the present Special Issue intends to make a stark statement by segregating urban legends from scientific evidence.

We look forward to receiving your contributions.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
