Deadline for manuscript
submissions:

closed (30 September 2023)

Message from the Guest Editor

A large body of literature heralds the potential benefits of precision medicine—a paradigm that uses individual variation in genes, environment, and lifestyle to improve disease prevention, diagnosis, and treatment. Breast cancer has been at the forefront of precision medicine. However, precision medicine approaches to breast cancer prevention have lagged behind advances in treatment. Expanding our ability to tailor and implement effective preventive interventions is necessary to fully realize the promise of precision medicine for public health. This Special Issue aims to showcase epidemiological, clinical, and translational research that moves the field toward the precision prevention of breast cancer. Research areas may include (but are not limited to) the following: improved risk assessment tools, novel biomarkers of risk, chemoprevention, genetic susceptibility, impact of precision medicine on health disparities, relevant data integration and analytic methods, and the implementation of precision prevention strategies.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
