

Cancer Minimally Invasive Surgery

Guest Editors:

Dr. Marco Vacante

Unit of Internal Medicine Critical Area—ARNAS Garibaldi, Catania, Italy

Prof. Dr. Antonio Biondi

Department of General Surgery and Surgical - Medical Specialties, University of Catania, Catania, Italy

Deadline for manuscript submissions:

closed (20 October 2023)

Message from the Guest Editors

The current evidence suggests a beneficial impact of minimally invasive (laparoscopic or robotic-assisted) cancer surgery (i.e. gastrointestinal, gynecologic, thoracic, and genitourinary) on the outcomes of surgery and quality of life. There have been many technological advances in the past half century, which have led to the development of minimally invasive procedures that can reduce the negative consequences of radical surgery. Nowadays, radical resections using laparoscopic and robotic surgical techniques rarely lead to major morbidity and mortality. In general, the short-term advantages of laparoscopic procedures, compared to open procedures, may include less postoperative pain, a smaller incision, earlier ambulation and return to work, a lower complication rate (i.e., bleeding), and shorter time of hospitalization. We invite research article submissions that will improve our knowledge on these topics. This Special Issue will publish original research and review articles.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
