Message from the Guest Editor

Dear Colleagues,

Cancer cell growth and proliferation can be activated by extracellular growth factors that bind to tyrosine kinase receptors or by extracellular matrix-integrin-focal adhesion kinase, Src signaling and its down-stream signaling pathways. In many cancer types, abnormal regulation of tyrosine kinase receptor signaling (TKR)s plays a role in cell cycle, proliferation, survival and oncogenesis. Targeting cancer cell proliferation by inhibiting TKRs, integrins and its down-stream intracellular signaling pathways is a potential approach to development of anticancer targeted therapy.

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
