Message from the Guest Editor

Dear Colleagues,

Cell therapy is part of the therapeutic arsenal of cancer treatment and has become a major therapeutic option in hematology, with the transplant of hematopoietic stem cells. It is now taking a new turn due to better knowledge of the functioning of immune cells and has benefited from renewed interest with the development of CAR T cells. Since their arrival on the market, other cells have entered the race, including CAR NK cells, CAR macrophages or CAR T regs, all with their own advantages and inconveniences. In this Special Issue, we wish to take stock of the developing and available cell therapies indicated in the treatment of hemopathies and solid tumors. We will discuss their regulatory status, their method of development and the criteria for evaluating their efficacy *in vitro* and *in vivo*.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
