Message from the Guest Editors

Dear Colleagues,

Over the last few years, the prognosis of metastatic melanoma patients has improved significantly due to new treatment options, such as checkpoint inhibition and targeted therapy. However, most efficacy data were obtained from randomized phase III trials with strict inclusion and exclusion criteria. As a consequence, there is a great need for data from clinical practice (real world data), for example, from registries that also address patients with, e.g., comorbidities or noncutaneous melanomas that were excluded in the clinical trials.

This Special Issue will highlight the current status of metastatic melanoma therapy and potential future prospects.

Manuscripts are welcome that report on original data or updated, comprehensive literature reviews in the field of melanoma therapy.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
