Deadline for manuscript submissions:

closed (20 May 2023)

Message from the Guest Editors

Dear Colleagues,

Head and neck cancer is a heterogeneous disease with complex molecular abnormalities and a growing number of diagnosed patients and still remains an important problem in oncology. Although different molecular subtypes have been proposed for head and neck cancer, and plenty of research has demonstrated progression along a series of neoplastic pathways, additional studies are needed to determine the specificity and molecular analysis proposed for screening in a group of head and neck cancer patients.

This Special Issue aims to highlight some of the advances achieved in our understanding of the molecular biology underlying certain clinicopathological characteristics of head and neck cancer.

In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: the molecular pathways of head and neck cancer; molecular alterations at genomic, transcriptomic, and proteomic level; the metabolome profile of head and neck cancer; epigenetics in head and neck cancer.

We look forward to receiving your contributions.

Prof. Dr. Joanna Katarzyna Strzelczyk

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
