Deadline for manuscript submissions:  
**closed (1 March 2022)**

### Message from the Guest Editor

The modeling of cancer biology through the development of tumor organoid models has undergone significant advances. A variety of organoid and three-dimensional culture models have been described to study the dynamic tumor pathophysiology, tissue–tissue interactions, and even the immune microenvironment. Potential applications of organoids in tumor biology include drug screening, immunotherapy, and personalized medicine. In this Special Issue, we will discuss recent developments and advances in organoid technology and three-dimensional culture models. Furthermore, we will highlight the applications of organoid models in the study of cancer biology.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
