### Message from the Guest Editors

Dear Colleagues,

Sarcomas are a group of rare cancers that arise in connective tissues of the body. These tumours exhibit a wide range of differing behaviours and underlying molecular pathologies. The two main types of sarcoma are soft tissue and bone sarcomas, but there are more than 70 different entities within these two categories.

There is limited medical understanding of this type of rare malignancy. The natural history of these aggressive tumours is characterized by a strong tendency toward local recurrence and metastatic spreading. Despite advances in therapeutic approaches over the last several decades, the outcome for metastatic patients remains poor. Therefore, it is important to identify patients who are at high risk for tumour recurrence and dissemination, which has resulted in an increasing interest in the investigation of prognostic biomarkers that help to guide treatment decisions.

In this Special Issue we will present original research and review articles highlighting novel therapeutic approaches in the treatment of sarcoma patients.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
