Zinc-Finger Proteins in Cancer

Guest Editors:

Dr. Charles Bailey

Group Leader, Cancer & Gene Regulation Laboratory Centenary Institute, The University of Sydney, Camperdown, NSW 2050, Australia

Prof. Dr. John Rasko

Gene and Stem Cell Therapy Program, Centenary Institute, The University of Sydney, Camperdown, NSW 2050, Australia

Deadline for manuscript submissions:

closed (31 December 2023)

Message from the Guest Editors

This Special Issue titled “Zinc-Finger Proteins in Cancer” welcomes multi-disciplinary submissions from scientists and clinicians in the following areas of expertise: molecular and cellular biology, cancer genetics, genomics, proteomics, protein biochemistry, structural biology, molecular dynamics, chromatin architecture, microscopy and super-resolution imaging, small animal models, bioinformatics, and pre-clinical and clinical studies.

We are pleased to invite past and potential *Cancers* authors to submit topical and timely research articles, as well as review and perspective pieces. We welcome submissions from diverse disciplines and researcher backgrounds, provided they address new insights into ZF proteins and their contribution to cancer. Papers that reveal new mechanisms using innovative experimental techniques and relevant biological models are preferred. Submissions that directly link ZF motif involvement or dysfunction to cancer pathophysiology will be highly regarded. We encourage submissions from higher-degree research students and early-career researchers, and these contributions should be clearly documented in the cover letter.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
