Advances in Radiology for the Detection, Diagnosis, and Management of Breast Cancer

Message from the Guest Editors

Breast cancer is the most frequently diagnosed cancer in women globally. Radiology is integral to early detection, accurate diagnosis, and monitoring treatment response. With emerging technologies such as contrast-enhanced mammography, breast MRI, ultrasound elastography, and AI-driven diagnostics, the landscape of breast imaging is rapidly evolving. This Special Issue invites original research, reviews, and clinical insights focused on advancing radiologic approaches in breast cancer care. We aim to highlight innovations that enhance diagnostic accuracy, personalize screening, assess neoadjuvant therapy response, and support long-term surveillance. Submissions may include original studies and reviews. Topics of interest include, but are not limited to the following:

- AI and radiomics in breast imaging;
- Contrast-enhanced and tomographic mammography;
- Breast MRI and elastography;
- Image-guided biopsy techniques;
- Radiologic evaluation of treatment response;
- Imaging in dense breast tissue and male breast cancer.

We are pleased to invite you to submit your work to this Special Issue. We welcome original articles and review articles and look forward to receiving your contributions.

Guest Editors

Prof. Dr. Takouhie Catherine Maldjian

Department of Radiology, Montefiore Health System and Albert Einstein College of Medicine, Bronx, NY 10467, USA

Dr. Mary M. Salvatore

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
