Oncology: State-of-the-Art Research in Austria

Message from the Guest Editors

Cancer remains one of the leading causes of death worldwide. Austrian scientists were among the pioneers in cancer research, and today, the scientific output of our small country is internationally acknowledged.

Furthermore, the clinical outcome of cancer patients in our country is among the best worldwide, and thus Austrian clinicians and scientists can look back on a great history and forward to a promising future. In the present Special Issue, we want to focus on modern Austrian cancer research in times of personalized and multimodal medicine. Nationwide and international collaborations will be our focus. All types of research, from basic to translational to clinical, as well as relevant review articles summarizing state-of-the-art knowledge, are welcome for submission. The full spectrum of cancer research and malignant diseases will be considered for publication. Also, historic articles looking back to the past of Austrian cancer research are welcome for submission. This Special Issue provides a platform to present the high quality of research and standard of care for the Austrian cancer research community.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
