Cell Migration and Invasion in Cancer

Message from the Guest Editor

Cell invasion and migration play important roles in embryonic development, homeostasis, and pathobiology and the process of cancer progression. Cell migration is coordinated by a plethora of cytoplasmic proteins which involve a transient signaling event with changes in the cellular architecture. In cancer progression, tumor cells originate from their primary site and metastasize to the distant organ. Various cytoplasmic protein and transcription factors have been identified to mediate this process. The progression of cancer to metastasis is a major reason for cancer death. In this Special Issue, we will briefly describe the role of various tumor suppressors, oncogenes, miRNA, and their targets in the regulation of tumor cell invasion, migration, and metastasis in different forms of cancer.

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
