Artificial Intelligence Supporting Global Cancer Statistics: Incidence and Mortality

Message from the Guest Editors

Despite extraordinary research successes thanks to increasingly targeted and effective treatments, tumors remain one of the leading causes of death, also due to the progressive aging of the population. This makes it necessary to strengthen prevention activities, also via statistical tumor studies. Effectively using artificial intelligence, the ability to manage big data and reconstruct patients' clinical information from different information sources via data exchange platforms between separate structures could allow the creation of highly effective data collection, implementation, and dissemination systems. Improving global cancer statistics (incidence and mortality) would lead to improved planning for primary and secondary prevention (risk management, screening), as well as treatments (tertiary prevention).

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
