Insights into Cancer Metabolism from Metabolomics

Message from the Guest Editors

There is an increasing recognition that, beyond somatic mutations, cancer can also be considered a metabolic disease. Proliferating tumors hijack normal metabolic processes to support increased bioenergetic and biosynthetic demands. Metabolomics investigations have made significant contributions to the mechanistic understanding of dysregulated cancer metabolism. In this Special Issue, we will publish reviews and original research articles that demonstrate the power of advanced metabolomics studies to identify diagnostic and/or prognostic biomarkers as well as reveal the detailed metabolic perturbations associated with cancer mechanisms.

Guest Editors

Prof. Dr. Thomas M. O'Connell

Department of Otolaryngology-Head & Neck Surgery, Indiana University School of Medicine, 1130 W. Michigan Ave, Indianapolis, IN 46202, USA

Dr. Wei Jia

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
