

Special Issue

Liver Interventional Oncology

Message from the Guest Editors

Interventional oncology (IO) plays a major role in the field of cancer treatment. The liver is certainly the organ in which IO is the most frequently applied, with so many different techniques available from liver biopsy to chemoembolization, percutaneous ablation, radioembolization, and hepatic arterial infusion of chemotherapy, to name but a few. This Special Issue will review and discuss some of the most recent innovations, as well as the consensus regarding liver IO.

Guest Editors

Prof. Dr. Boris Guiu

Department of Medical Imaging and Interventional Radiology, St-Eloi University Hospital, 80 Avenue Augustin Fliche, 34295 Montpellier, France

Dr. Etienne Garin

Rennes Cancer Center, Rennes, France

About the Journal

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Editor-in-Chief

Prof. Dr. Samuel C. Mok

Department of Gynecologic Oncology and Reproductive Medicine, The University of Texas MD Anderson Cancer Center, Houston, TX 77030, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
