# Advanced Nanomaterials for Emerging Contaminants Removal in the Environment and Sustainable Development

Guest Editors:

**Dr. Pham Thi Huong**
Department of Materials Science and Engineering, Gachon University, 1342 Seongnam-daero, Seongnam 13120, Republic of Korea

**Dr. Minh Viet Nguyen**
Key Laboratory of Advanced Materials for Green Growth, VNU University of Science, Ha Noi, Vietnam

Deadline for manuscript submissions:
**closed (30 June 2023)**

## Message from the Guest Editors

Potential topics of this Special Issue include, but are not limited to, the following: the development of nanostructured photocatalytic materials for environmental remediation and green growth; the development of catalytic nanomaterials and their applications in green chemical processes; the development of adsorbent materials for environmental pollution control; the development of nanocomposite and hybrid-nanocomposite materials, multifunctional materials, and their applications in environmental pollution control and green industries; the development of advanced materials for effective, environmentally friendly, and sustainable agriculture in accordance with low carbon agriculture orientation; and the development of advanced materials for water splitting and CO2 conversion.

You are welcome to visit the **website**, submit the **abstract**, and **full paper**. Any questions please feel free to contact the managing editor Angela Xue (angela.xue@mdpi.com). We look forward to receiving the contribution from you!
