

# *catalysts*

an Open Access Journal by MDPI

## Feature Review Papers in Catalysis for Sustainable Energy

Guest Editors:

**Prof. Dr. Maria A. Goula**

Department of Chemical  
Engineering, University of  
Western Macedonia, GR-50100  
Kozani, Greece

**Prof. Dr. Maria Cornelia Iliuta**

Chemical Engineering  
Department, Université Laval,  
Québec, QC G1V 0A6, Canada

Deadline for manuscript  
submissions:

**31 December 2024**

### Message from the Guest Editors

Catalysis is an enabling technology used to promote sustainability, environment, energy, health, and quality of life. In addition to promoting the feasibility, eco-efficiency, and economics of over 90% of chemical processes, catalysis is a critical element associated with sustainability in many chemical industry fields, from mobility (catalytic converters in vehicles, cleaner fuels, better lubricants, etc.) to a wide range of emission clean-up technologies (DeNOx for power plants, etc.).

This Special Issue aims to collect high-quality review articles in the field of catalysis, for which the Editorial Board Members of the journal *Catalysts*, Section “Catalysis for Sustainable Energy”, and other researchers working in the field, are cordially invited to contribute. Review articles dealing with homogeneous and heterogeneous, as well as photo-, electro-, and enzymatic catalytic processes, directed to energy and/or renewable fuel production and use in a sustainable manner (employing both theoretical and experimental tools) are welcome.
