Pharmaceutical Engineering,
Nanjing Tech University, Nanjing,
China

Prof. Dr. Xingguang Zhang

Department of Materials and
Chemical Engineering, University
of Shanghai for Science and
Technology, Shanghai, China

Deadline for manuscript
submissions:

closed (30 September 2023)

Message from the Guest Editors

This Special Issue aims to report the latest advancements in the design and optimization of heterogeneous as well as homogeneous catalysts for lignocellulose upgrading. Reviews and original papers or communications related to the development of all kinds of heterogeneous and homogeneous catalyst systems for the catalytic conversion of lignocellulose are welcome.

Keywords

- lignocellulose upgrading
- biorefinery
- value-added chemicals and fuels
- heterogeneous catalysts
- homogeneous catalysts
- catalyst characterization
