Message from the Guest Editors

Dear Colleagues,

It is universally recognized that enzyme-mediated catalysis has become increasingly popular since enzymes are highly specific and efficient. The enzymatic reaction system offers several advantages in terms of improved reaction selectivity, reduced energy costs, enhanced reliability, environmental friendliness, and sustainability.

In this Special Issue, we welcome original research articles and reviews focused on all aspects of enzymatic reaction for bio-based chemicals production, including process optimization, enzyme production, bio-reactor, biomass utilization, enzymology, nanotechnology, life cycle analysis etc.

Dr. Wei Du
