

Special Issue

Enzymatic and Chemoenzymatic Cascade Reactions

Message from the Guest Editors

In this Special Issue, *Enzymatic and Chemoenzymatic Cascade Reactions*, we aim to present and discuss diverse strategies for integrating multiple enzymatic and chemo-enzymatic reactions, either in one-pot or sequential processes. We highlight case studies in pharmaceutical, fine chemical, and natural product synthesis, showcasing the versatility and industrial relevance of cascade reactions. Emphasis is placed on enzyme and reaction compatibility, synergistic interactions between enzymatic and chemical catalysts, and the optimization of reaction conditions—all aimed at maximizing yields and improving overall reaction economy. The integration of enzyme engineering further expands the scope of cascade reactions, offering a path toward more sustainable and economically viable manufacturing.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Keith Hohn
Carl R. Ice College of Engineering, Kansas State University, Manhattan,
KS, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, CAB Abstracts, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Physical) / CiteScore - Q1 (General Environmental Science)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.9 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
