State of the Art and Perspectives in Lung Cancer Immunotherapy

Guest Editor:

Dr. Elizabeth Fabre

Department of Thoracic
Oncology, Hôpital Européen
Georges Pompidou, AP-HP,
Carpem Cancer Institute, 75015
Paris, France
INSERM Team UMR_S970,
Immunotherapy and
Antiangiogenic Treatment in
Cancerology, Paris Descartes
University, 75015 Paris, France

Deadline for manuscript submissions: closed (20 March 2024)

Message from the Guest Editor

Immune checkpoint inhibitors have drastically changed therapeutic strategies in lung cancer. However, novel composite and dynamic biomarkers of immune evasion are needed to develop tailored strategies. Indeed, a global approach integrating both immune and tumor-related parameters is crucial. Numerous ongoing clinical trials are evaluating novel immune-based combinations in order to overcome resistance pathways and reshape the immunotherapy landscape. However, an understanding of cellular and molecular mechanisms of resistance is essential to guide personalized immunotherapies.

This Special Issue will include original articles and reviews that investigate signaling pathways of resistance to immunotherapy and new therapeutic strategies for lung cancer. We encourage contributions that explore the cellular and molecular aspects of resistance or recent advances including adoptive cell therapy and therapeutic cancer vaccines. Preclinical and clinical studies investigating the impact of the tumor microenvironment on the immunological response are also warranted.

Editors-in-Chief

Prof. Dr. Alexander E. Kalyuzhny

Neuroscience, UMN Twin Cities, 6-145 Jackson Hall, 321 Church St SE, Minneapolis, MN 55455, USA

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation Centre, The University of Copenhagen, Copenhagen, Denmark

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
