Vanvitelli”, 80138 Naples, Italy

Deadline for manuscript
submissions:

closed (30 July 2023)

Message from the Guest Editor

Dear Colleagues,

Sarcomas are heterogeneous mesenchymal malignancies arising from bone, cartilage, or connective tissues such as muscle, fat, peripheral nerves, fibrous, or related tissues, and range from indolent to highly invasive and metastatic. From a molecular genetics perspective, few are currently targeted therapeutically. A better understanding of the underlying oncogenic processes and their regulatory mechanisms is essential to improve the patient outcomes of these devastating diseases. Furthermore, the emerging genomic and functional genetic approaches, coupled with novel therapeutic strategies, may have the potential to transform the care of patients with sarcoma.

Prof. Dr. Cord Brakebusch

Biotech Research & Innovation
Centre, The University of
Copenhagen, Copenhagen,
Denmark

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
