Molecular Insights into Systemic Lupus Erythematosus Pathogenesis: From Genes to Immune Signaling

Guest Editor:

Dr. Shunichi Shiozawa

Institute for Rheumatic Diseases,
Ashiya, Japan

Deadline for manuscript
submissions:

31 October 2024

Message from the Guest Editor

Dear Colleagues,

I am a professor of medicine whose work contributes significantly to the clarification of the pathogenesis of systemic lupus erythematosus and autoimmune diseases.

As an invited editor, I hereby invite review manuscripts on the pathogenesis of SLE, the review based on author's direct evidence. Review articles expounding the author's direct evidence are highly useful for and influential in scientific community because of the prohibition of critical discussions in many recent scientific journals. There is extensive indirect evidence of the pathogenesis of SLE. However, this contributes nothing to the clarification of the pathogenesis of SLE and to the progress of science and medicine. I encourage authors with direct evidence on the pathogenesis of SLE to post their review manuscripts.

Dr. Shunichi Shiozawa

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Cell Biology*) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
