Prof. Dr. Katarzyna Komosinska-Vassev

Department of Clinical Chemistry and Laboratory Diagnostics, Faculty of Pharmaceutical Sciences in Sosnowiec, Medical University of Silesia in Katowice, 41-200 Sosnowiec, Poland

Deadline for manuscript submissions:
closed (31 August 2023)

Message from the Guest Editors

Dear Colleagues,

Civilization diseases constitute a growing global problem, reflected in both the practical and scientific sphere of health care of specialists, e.g., diagnosticians, biotechnologists, pharmacists and medicine doctors.

This Special Issue's goal is to promote the current knowledge concerning the discovery, development and implementation of novel disease-specific biomarkers in clinical practice that are useful in the diagnosis, treatment monitoring and prediction of patient outcomes.

We hope for conditions including autoimmune-related disorders and cardiovascular and metabolic diseases to be at the center of attention in this Special Issue entitled "Diagnostic, Prognostic and Therapeutic Biomarkers Related to Civilization Diseases—State-of-the-Art".

Furthermore, we would like encourage interested researchers to prepare and send experimental publications as well as review articles referring to potential, innovative diagnostic tools dedicated to the diagnosis and monitoring of the effectiveness of treatments or forecasting the severity of diseases and their acute and chronic complications.

Prof. Pawel Olczyk

Message from the Editorial Board

Cells has become a solid international scientific journal that is now indexed on SCIE and in other databases. We have successfully introduced a special issues format so that these issues serve as mini-forums in specific areas of cell science. *Cells* encourages researchers to suggest new special issues, serve as special issues editors, and volunteer to be reviewers. Our main focus will remain on cell anatomy and physiology, the structure and function of organelles, cell adhesion and motility, and the regulation of intracellular signaling, growth, differentiation, and aging. We are open to both original research papers and reviews.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (Cell Biology) / CiteScore - Q1 (General Biochemistry, Genetics and Molecular Biology)
